

PLEASE SAVE RED HILL – SAY NO TO INAPPROPRIATE HOUSING DEVELOPMENT

We the undersigned strongly object to the proposed housing development on Federal Golf Course. It is reliant on major works within the Red Hill Nature Park and road reserve to provide roads, fire protection and kilometers of service connections. The development would significantly degrade one of Australia’s most significant temperate woodlands, dramatically increase the risk of local extinction of woodland birds and lead to widespread spread of weeds and feral animals. It will place housing in a fire prone cul de sac, remote from any facilities, the car will be the only form of transport and it will lead to significantly increased traffic on roads that are already above their nominated environmental capacity. We urge you not to support the approval of this poorly planned and unnecessary proposal.
